

Immigrants and WIOA Services

Comparison of Sociodemographic Characteristics of Native- and Foreign-Born Adults in Ohio

By Margie McHugh and Madeleine Morawski

This fact sheet provides a profile of key characteristics of foreign-born and native-born residents of the state of Ohio that are relevant to understanding needs for adult education and workforce training services. It is part of a larger series of state and county fact sheets produced by the Migration Policy Institute's (MPI) National Center on Immigrant Integration Policy to support equitable implementation of the *Workforce Innovation and Opportunity Act* (WIOA), as well as consideration of other policy and funding initiatives to promote the successful linguistic, economic, and civic integration of immigrants and refugees who have settled in the United States.

The estimates provided are based on MPI analysis of U.S. Census Bureau American Community Survey (ACS) data pooled over the 2009-13 period in order to provide the most detailed sociodemographic portrait possible of residents' characteristics. Mirroring the design of federal adult education and workforce training program rules, data are provided for those ages 16 and over.

1) Nativity, Age, and Origin of Ohio Residents

As of 2009-13, Ohio was home to almost 9.2 million residents ages 16 and older; 420,000 of whom, or 5 percent, were foreign born. Relatively fewer of Ohio's foreign-born individuals are ages 16-18 or ages 19-24 as compared to its native-born residents; rather, they are more likely to be in their prime working years, with 65 percent falling in the 25-to-44 and 45-to-59 age bands (compared to 59 percent of those who are native born). Of particular note are the 43 percent of foreign-born individuals who are 25 to 44 years old, a group that will continue to play a key role in the state's labor force for several decades to come.

Just 20 percent of the state's immigrant residents ages 16 and over hail from Latin America; 38 percent are of Asian origin—significantly higher than the 28 percent share nationally; and 27 percent are European, also much higher than the national share of 13 percent. African immigrants comprise 11 percent of Ohio's immigrant population, compared to just 4 percent nationally.

Relevance for WIOA Implementation: Provisions of WIOA's Title I address the country's three primary workforce training programs (youth, adult, and dislocated worker), target sub-populations within them (e.g. out-of-school youth ages 16 to 24), and the nature of services to be provided through them. Title II of the law—Adult Education and Literacy (commonly referred to as the *Adult Education and Family Literacy Act*, or AEFLA)—provides the national framework for services designed to build the basic skills of adults who lack a high school diploma or equivalent or who are Limited English Proficient (LEP). States and localities must

Northern America	X	X	X	14,000	3%	
Oceania	X	X	X	1,000	0%	

Notes: Latin America includes South America, Central America, Mexico, and the Caribbean; Northern America includes Canada, Bermuda, Greenland, and St. Pierre and Miquelon. All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Source: Migration Policy Institute (MPI) analysis of U.S. Census Bureau data from the pooled 2009-13 American Community Survey (ACS).

ensure that eligible populations are given equitable access to information and services provided under the law in order not to run afoul of federal civil-rights and antidiscrimination provisions. This includes, for example, ensuring that language barriers do not impede access to information and services provided by American Job Centers (formerly known as One-Stop Career Centers) through which states and localities organize local access to WIOA-funded services. Given the size of its foreign-born population (and their range of educational backgrounds and levels of English proficiency—as described below), those engaged in implementing WIOA in Ohio face complex challenges in ensuring that the state’s diverse immigrant and refugee populations have equitable access to services provided under the law.

2) Educational Attainment

Foreign-born young adults represent 4 percent of the state’s 19-to-24-year-olds but are more than 1.5 times as likely as native-born peers to lack a HSD/E, comprising 6 percent of state residents in this age range who have not obtained a HSD/E. Further, foreign-born young adults who lack a HSD/E are significantly more likely than their native-born peers to not be enrolled in school and working (51 percent versus 30 percent).

Foreign-born individuals account for 5 percent of Ohio residents ages 25 and older; they are more than 1.5 times as likely as native-born peers to lack a HSD/E, accounting for 8 percent of adults in this age group who have not completed high school. At the other end of the education spectrum, 40 percent of foreign-born individuals ages 25 and over

hold a bachelor’s degree or higher compared to just 24 percent of those who are native born.

Relevance for WIOA Implementation: Out-of-school youth are a primary focus of WIOA’s Title I workforce services, and adults who lack a HSD/E are targets for both Title I and Title II services. Given that foreign-born individuals are significantly over-represented among those with no HSD/E, services created with these funds should be targeted in equitable measure to meet their needs. This will represent a shift for local systems that heretofore have not prioritized those with basic skills needs (whether native- or foreign born) for workforce training services, and/or whose service design is largely sequential—i.e. expecting adults to complete basic skills requirements before gaining access to workforce training programs. At the same time, provisions in the law that promote the use

of career pathway service designs for serving WIOA clients pose significant capacity-building challenges for the state, given the difficulties many such pathway programs face in equitably serving adults with basic skills needs.¹ Integrated education and training models must also comply with immigration status restrictions placed on Title I-funded programs.² However, while those who lack work authorization are not eligible for WIOA-funded workforce services, all refugees and the majority of Ohio immigrants legally reside in the United States and are therefore eligible for Title I as well as Title II services, which are not subject to immigration status restrictions.³

Finally, the analysis also shows that immigrants under age 25 who lack a HSD/E are far more likely than their native-born counterparts to be employed and not enrolled in school. This points

Table 2. Educational Attainment of Ohio Residents (ages 16 and older), by Nativity, 2009-13

Educational Attainment	Total	Native Born		Foreign Born	
	Number	Number	Percent	Number	Percent
Population ages 16 to 18	478,000	466,000	100%	12,000	100%

Source: MPI analysis of pooled 2009-13 ACS.

to a need for education and training services designed for “nontraditional” students—i.e., in addition to using appropriate instructional designs, programs should anticipate the needs of part-time students, the demands of their work schedules, and transportation issues or other constraints they may face in attending and completing more traditionally structured programs.

3) Limited English Proficiency and Educational Attainment

Estimates of limited English proficiency among Ohio residents are provided below given the relevance of LEP status⁴ for access to WIOA-funded services—e.g., English Language Acquisition services (formerly known as English-as-a-Second-Language or ESL) are a key element of AEFLA services, while adult English learners meet the “priority” definition for adult workforce services.⁵ Table 3 also provides individuals’ LEP status crossed with levels of educational attainment, in order to inform the efforts of state and local planners to provide education and training services that equitably meet the needs of LEP individuals with different levels of formal education.

Foreign-born individuals account for 73 percent of Ohio’s LEP residents, who number 223,000 total. Among all LEP individuals ages 19 to 24 and ages 25 and older, 75,000 lack a HSD/E, indicating that 7 percent of the state’s approximately one million low-educated adults are also LEP. Significant numbers of LEP individuals also have high levels of underlying education, including 49,000 native- and foreign-born LEP individuals ages 25 and older who have earned a high school diploma or equivalent, and an additional nearly 72,000 who have either completed some college or an associate’s degree, or who have earned a bachelor’s degree or higher.

Relevance for WIOA Implementation: Ohio’s large populations of LEP and low-educated

individuals are eligible for AEFLA services, which in recent years met only about 4 percent of need nationally.⁶ The state faces complex challenges in equitably reflecting the significant and wide range of LEP learner needs and goals in its Combined State Plan that will govern WIOA service provision in Ohio and that the U.S. Secretaries of Labor and Education must ultimately approve. For one, the state’s LEP residents include those who need AEFLA services but may not seek to achieve the employment or postsecondary transition and completion goals that are the primary focus of the law’s narrow accountability measures. This group of individuals may include, for example, those seeking only citizenship preparation services and immigrant mothers of young children seeking literacy and other programming that will help them support their children’s kindergarten readiness.

In addition, the law’s significant new emphasis on postsecondary training is likely to pose major challenges for local systems that in the past provided ESL and workforce training services separately and/or served few low-skilled or LEP individuals in Title I programs. While new provisions in WIOA do target workforce services to these basic-skills-deficient individuals, the record of career pathway models and other training programs in providing equitable access to individuals who are low-educated and/or LEP is very weak. This is an especially urgent concern in Ohio where, for example, only 0.1 percent of those exiting from Title I adult intensive or training services in the 2014-15 program year were LEP.⁷

Stakeholders in WIOA’s implementation therefore face challenges in ensuring that local service plans and the state’s Combined Plan provide both the range of AEFLA services envisioned under the law and equitable access to Title I-funded services for low-educated and/or LEP individuals who are work authorized. Significant policy, planning, and capacity-building efforts will be needed as the state and its localities take steps to address their obligation to provide equitable access to Title I-funded programs for those who are LEP and

lack a HSD/E, as well as the significant number of LEP individuals who already possess a high school diploma or higher and are therefore positioned to directly access postsecondary-level training programs.

4) Brain Waste

“Brain waste”—the phrase used to describe when individuals with four-year college degrees or higher work in low-skilled jobs or

are unemployed—is a particular concern for foreign-educated immigrants given the unique barriers they often face in attempting to transfer their education, training, and work experience to the U.S. labor market.⁸ More than half (57 percent) of Ohio’s foreign-born individuals who possess a college degree or higher were educated abroad (see Table 2), indicating a significant share of the state’s highly educated immigrants and refugees is at risk for brain waste.

Data provided in Table 3 point to one of the

Table 3. Limited English Proficiency and Educational Attainment of Ohio Residents (ages 16 and older), by Nativity, 2009-13

LEP Population by Educational Attainment	Total	Native Born		Foreign Born

Table 4. Brain Waste among Ohio Residents (ages 25 and older), by Nativity, 2009-13

Brain Waste	Native Born		Foreign Born	
	Number	Percent	Number	Percent
Total civilian, college-educated labor force	1,386,000	100%	110,000	100%
Underutilized (i.e., in low-skilled jobs or unemployed)	255,000	18%	21,000	19%

Note: All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Source: MPI analysis of pooled 2009-13 ACS.

most significant factors responsible for brain waste—limited English proficiency. Among foreign-born LEP individuals ages 25 and older, 34,000 (23 percent) have completed a bachelor’s degree or higher. Few adult education programs currently provide instruction that can help these individuals acquire the academic or professional-level English that will allow them to fully apply their education and training in the U.S. labor market.

In addition to difficulties accessing professional-level English classes, other factors that can contribute to brain waste include lack of recognition by employers or licensing bodies of academic or professional qualifications obtained abroad, difficulties in filling gaps in education or gaining U.S. work experience, steep and expensive barriers to gaining professional licenses, and/or poor understanding of U.S. job search norms. Table 4 provides estimates of brain waste among native-born and foreign-born residents of Ohio, showing 18 percent of all highly educated workers in the state affected, with the high levels of education of the foreign born slightly more likely to be underutilized (19 percent versus 18 percent).

Relevance for WIOA Implementation: Highly educated individuals who are LEP fall into the “basic-skills-deficient” service priority category for Title I adult workforce services and also qualify for Title II-funded services. Many of these individuals have degrees in the health-care, STEM, and education fields where their skills can be applied in high-demand occupations. Nimble workforce and adult education programs can help address the particular needs of these individuals by braiding funds across titles—or using strictly Title I funds—to help them return to jobs in their profession or a

related field that will leverage the significant investments they have already made in their education and training.

5) Parents of Young Children

Parents of young children have long been a population of special focus for adult education and training programs due to the powerful role education and skills play in helping them provide economic stability for their family, and the predictive role of parental education—particularly the mother’s—for the future educational success of their children. This focus is especially pertinent now, with policymakers at all levels of government engaged in intensive efforts to scale quality early childhood programs that will close gaps in school readiness that could otherwise threaten children’s lifelong education and career prospects. As their children’s first and most important teachers, parents are universally acknowledged as critical to the success of these efforts.

Though they comprise 5 percent of the state’s overall population ages 16 and older, Ohio’s immigrants and refugees account for 6 percent of parents residing with at least one child under age 18, and 7 percent of those with at least one child ages 0 to 8. Among parents residing with at least one child under age 18, single-mother or single-father households are less common among the foreign born (14 percent versus 26 percent for native born). Immigrants and refugees comprise 15 percent of the state’s low-educated parents of young children, being more than twice as likely as their native-born counterparts to lack a high school diploma or equiva-

Table 5. Family Structure and Young-Child Parental Status for Ohio Residents (ages 16 and older), by Nativity, 2009-13

Parental Status	Total	Native Born		Foreign Born	
	Number	Number	Percent	Number	Percent
Reside with at least one child under age 18	2,219,000	2,082,000	100%	137,000	100%
Single mother	438,000	424,000	20%	14,000	10%
Single father	129,000	124,000	6%	5,000	3%
Two parents	1,652,000	1,534,000	74%	118,000	86%
Reside with at least one child ages 0-8	1,276,000	1,183,000	100%	92,000	100%
Limited English Proficient (LEP)	47,000	10,000	1%	38,000	41%
Low-educated	112,000	95,000	8%	17,000	18%
Low-income (below 200% of FPL)	495,000	452,000	38%	43,000	46%

FPL = Federal poverty level.

Notes: The FPL, calculated based on total family income before taxes (excluding capital gains and noncash benefits such as food stamps), was \$23,834 for a family of four in 2013. All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Source: MPI analysis of pooled 2009-13 ACS.

lent. Foreign-born parents of young children are also more likely to have low incomes—46 percent versus 38 percent of the native born. Not surprisingly, foreign-born parents account for the vast majority of the state’s LEP parents of young children (80 percent).

Relevance for WIOA Implementation: Though WIOA’s Title II provisions speak of services that “enable parents or family members to support their children’s learning needs” and provide “training for parents or family members regarding how to be ... full partners in the education of their children,” the law’s performance measures leave little room for states to serve parents who are arguably most in need of these services. Many low-educated and/or LEP parents who seek such programs do not have learning goals that align with the law’s primary performance measures—particularly those focused on employment, earnings, and secondary/postsecondary degree and credential attainment.⁹ With all WIOA-funded programs judged according to these measures and with states facing financial penalties should they not meet performance targets, many states and localities may be reluctant to provide AEFLA services to low-educated and LEP parents whose primary concerns are basic literacy and supporting their children’s kinder-

garten readiness and future educational success. Should Ohio choose to maintain parent-focused programs for this population it would likely need to negotiate lower performance targets for these programs on the law’s six accountability measures, and presumably judge their performance against state measures that better reflect expected outcomes of parent-focused programs. Alternatively, the state or its localities may simply avoid serving many parents of its most at-risk young children with AEFLA funds—even though failing to address their needs could undermine the success of investments being made by all levels of government in early childhood education and care (ECEC) services.

6) Poverty and Health Insurance

WIOA’s investments are intended to help meet local needs for skilled workers while also reducing welfare dependency and supporting workers in attaining education and skills that will allow them to earn a family-sustaining wage. While many of Ohio’s immigrants enjoy high levels of education and earnings, Table 6 data indicate that the state’s foreign-born residents are more likely to earn below either 100 percent or 200

Table 6. Poverty and Health Insurance for Ohio Residents (ages 16 and older), by Nativity, 2009-13

	Total	Native Born		Foreign Born	
Poverty	Number	Number	Percent	Number	Percent
Population (for whom poverty status is determined)	8,903,000	8,494,000	100%	409,000	100%
Below 100% of FPL	1,229,000	1,155,000	14%	74,000	18%
100-199% of FPL	1,561,000	1,481,000	17%	80,000	20%
At or above 200% of FPL	6,113,000	5,858,000	69%	256,000	62%
Health Insurance Coverage					
Total population	9,177,000	8,757,000	100%	420,000	100%
No health insurance coverage	1,263,000	1,163,000	13%	101,000	24%

FPL = Federal poverty level.

Notes: The FPL, calculated based on total family income before taxes (excluding capital gains and noncash benefits such as food stamps), was \$23,834 for a family of four in 2013. All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Source: MPI analysis of pooled 2009-13 ACS.

percent of the federal poverty level (FPL),¹⁰ with 38 percent falling below the 200 percent threshold as compared to 31 percent for those who are native born. Looking to an additional indicator of economic vulnerability, the state’s foreign-born adults are nearly twice as likely to lack health insurance coverage as those who are native born.

Relevance for WIOA Implementation: WIOA’s broad architecture as well as many of its specific provisions place a tight focus on directing services to low-income individuals, with the goal of helping them attain the education, degrees, and credentials they need to ensure a lifetime of improved earnings and economic stability. The disproportionate representation of foreign-born individuals among Ohio residents living in or near poverty provide important measures against which the adequacy of state and local service designs and equity in distribution of services can be gauged.

7) U.S. Citizenship and Immigration Status

Publicly available data from the U.S. Census Bureau’s American Community Survey (ACS) are the basis for all figures provided in the preceding sections of this profile. However, immigra-

tion status affects eligibility for certain WIOA services, and the ACS does not collect detailed information on respondents’ immigration status. To better assist stakeholders in considering the interplay of immigration status with WIOA implementation efforts, Table 7 provides estimates of the shares of foreign-born Ohio residents in key immigration-status categories. The MPI estimates are based on a methodology that imputes immigration status from two Census Bureau surveys—the ACS and the Survey of Income and Program Participation (SIPP).¹¹ In part because this methodology involves inflating ACS figures in order to account for presumed undercounting of noncitizens, especially those who are unauthorized, the figures are not directly comparable to the estimates used in the earlier portions of this profile.

Using this methodology, MPI estimates that among Ohio immigrants ages 16 and older, 47 percent were naturalized citizens. Of the 240,000 noncitizens, 52 percent were legal permanent residents (LPRs) and 31 percent were unauthorized.¹² Within the unauthorized population, 13 percent—10,000 individuals—were potentially eligible to apply for protection from deportation and work authorization under the Deferred Action for Childhood Arrivals (DACA) program when it first launched in 2012, with thousands more aging into eligibility since that time. Many have come forward to obtain these protections; according to U.S. Citizenship and

Table 7. U.S. Citizenship Status of Foreign-Born Residents (ages 16 and older) in Ohio, 2009-13

U.S. Citizenship Status	Number	Percent
Foreign born	451,000	100%
Naturalized citizens	211,000	47%
Noncitizens	240,000	53%
Legal permanent residents	126,000	52%
Legal nonimmigrants	39,000	16%
Unauthorized immigrants	75,000	31%
DACA immediately eligible (2012)	7,000	10%
DACA eligible but for education (2012)	3,000	4%

Note: All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Sources: MPI analysis of U.S. Census Bureau data from the pooled 2009-13 ACS, and the 2008 Survey of Income and Program Participation (SIPP) by James D. Bachmeier and Colin Hammar of Temple University and Jennifer Van Hook of The Pennsylvania State University, Population Research Institute.

Immigration Services (USCIS), 3,769 Ohio residents had received DACA status as of September 2015.¹³

Relevance for WIOA Implementation: Immigration status is relevant to a variety of WIOA programs beyond the broad provisions described earlier that restrict unauthorized immigrants from accessing Title I services and the absence of status restrictions placed on Title II services. For example, under Title II a primary purpose of the Integrated English Literacy and

Civics Education program is to support immigrants in preparing for citizenship and full participation in the civic life of their community.¹⁴ And while all immigrants—regardless of immigration status—are eligible for AEFLA services, states that choose to braid Title I and II funds to provide integrated education and training services may inadvertently place Title II funds beyond the reach of unauthorized immigrants and/or create the need to implement complex new administrative procedures to assess the immigration status of recipients of adult education services.

Endnotes

About the Authors

Margie McHugh is Director of the Migration Policy Institute’s National Center on Immigrant Integration Policy. Her work focuses on education quality and access issues for immigrants and their children from early childhood through K-12 and adult, postsecondary and workforce skills programs. She also leads the Center’s work seeking a more coordinated federal response to immigrant integration needs and impacts, and more workable systems for recognition of the education and work experience immigrants bring with them to the United States.

Prior to joining MPI, Ms. McHugh served for 15 years as Executive Director of The New York Immigration Coalition, an umbrella organization for over 150 groups in New York that uses research, policy development, and community mobilization efforts to achieve landmark integration policy and program initiatives. Prior to joining NYIC, Ms. McHugh served as Deputy Director of New York City’s 1990 Census Project and as Executive Assistant to New York Mayor Ed Koch’s chief of staff.

Ms. McHugh is a graduate of Harvard and Radcliffe Colleges.

Madeleine Morawski is an Associate Policy Analyst at MPI, where she provides program support for the National Center on Immigrant Integration Policy and works on issues such as adult education, early childhood education, and language access.

Previously, Ms. Morawski worked as a Research Assistant at the Kalmanovitz Initiative for Labor and the Working Poor and as an intern with the U.S. Committee for Refugees and Immigrants.

She has a bachelor’s of science in foreign service from Georgetown University, where she majored in international politics and completed a certificate in international development.

Acknowledgments

The authors are grateful to MPI colleagues Jie Zong and Jeanne Batalova for their compilation of U.S. Census Bureau data used throughout this fact sheet.

For more information please contact Margie McHugh, Director of MPI's National Center on Immigrant Integration Policy (mmchugh@migrationpolicy.org), or Associate Policy Analyst Madeleine Morawski (mmorawski@migrationpolicy.org).

The Migration Policy Institute (MPI) is an independent, nonpartisan, nonprofit think tank dedicated to the study of the movement of people worldwide. The Institute provides analysis, development, and evaluation of migration and refugee policies at the local, national, and international levels. It aims to meet the rising demand for pragmatic responses to the challenges and opportunities that migration presents in an ever more integrated world.
