

Immigrants and WIOA Services

Comparison of Sociodemographic Characteristics of Native- and Foreign-Born Adults in Virginia

By Margie McHugh and Madeleine Morawski

This fact sheet provides a profile of key characteristics of foreign-born and native-born residents of the state of Virginia that are relevant to understanding needs for adult education and workforce training services. It is part of a larger series of state and county fact sheets produced by the Migration Policy Institute's (MPI) National Center on Immigrant Integration Policy to support equitable implementation of the *Workforce Innovation and Opportunity Act* (WIOA), as well as consideration of other policy and funding initiatives to promote the successful linguistic, economic, and civic integration of immigrants and refugees who have settled in the United States.

The estimates provided are based on MPI analysis of U.S. Census Bureau American Community Survey (ACS) data pooled over the 2009-13 period in order to provide the most detailed sociodemographic portrait possible of residents' characteristics. Mirroring the design of federal adult education and workforce training program rules, data are provided for those ages 16 and over.

1) Nativity, Age, and Origin of Virginia Residents

As of 2009-13, Virginia was home to more than 6.4 million residents ages 16 and older; 850,000 of whom, or 13 percent, were foreign born. Relatively fewer of Virginia's foreign-born individuals are ages 16-18 or ages 19-24 as compared to its native-born residents; rather, they are more likely to be in their prime working years, with 73 percent falling in the 25-to-44 and 45-to-59 age bands (compared to 59 percent of those who are native born). Of particular note are the 48 percent of foreign-born individuals who are 25 to 44 years old, a group that will continue to play a key role in the state's labor force for several decades to come. Given their generally younger profile, it is not surprising that the state's foreign born are also less likely than the native born to be over 60 (16 percent versus 24 percent).

Only 36 percent of the state's immigrant residents ages 16 and over hail from Latin America, as compared to 53 percent nationwide; 41 percent are of Asian origin—significantly larger than the 28 percent share nationally; and 9 percent are of African origin, also higher than the national share of 4 percent.

Relevance for WIOA Implementation: Provisions of WIOA's Title I address the country's three primary workforce training programs (youth, adult, and dislocated worker), target subpopulations within them (e.g. out-of-school youth ages 16 to 24), and the nature of services to be provided through them. Title II of the law—Adult Education and Literacy (commonly referred to as the *Adult Education and Family Literacy Act*, or AEFLA)—provides the national framework for services designed to build the basic skills of adults who lack a

Table 1. Age, Gender, and Origin of the Virginia Population (ages 16 and older), by Nativity, 2009-13

	Total		Native Born		Foreign Born

Source: Migration Policy Institute (MPI) analysis of U.S. Census Bureau data from the pooled 2009-13 American Community Survey (ACS).

high school diploma or equivalent or who are Limited English Proficient (LEP). States and localities must ensure that eligible populations are given equitable access to information and services provided under the law in order not to run afoul of federal civil-rights and antidiscrimination provisions. This includes, for example, ensuring that language barriers do not impede access to information and services provided by American Job Centers (formerly known as One-Stop Career Centers) through which states and localities organize local access to WIOA-funded services. Given the highly diverse nature of its foreign-born population (and their range of educational backgrounds and levels of English proficiency—as described below), those engaged in implementing WIOA in Virginia face complex challenges in ensuring that the state’s large and diverse immigrant

population has equitable access to services provided under the law.

2) Educational Attainment

Foreign-born young adults represent 10 percent of the state’s 19-to-24-year-old population but are three times as likely to lack a high school diploma or equivalent (HSD/E) as their native-born peers, comprising more than one-quarter of state residents in this age range who have not obtained a HSD/E. While foreign-born young adults who lack a HSD/E are slightly more likely their native-born peers to be enrolled in school (22 percent versus 20 percent), they are significantly more likely than the native born to be working (52 percent versus 31 percent).

Foreign-born individuals account for 14 percent of Virginia residents ages 25 and older; they are almost twice as likely as native-born peers to lack a HSD/E, accounting for 22 percent of adults in this age group who have not completed high school. At the other end of the education spectrum, they are more likely than native-born adults to hold a bachelor's degree or higher (40 percent versus 34 percent).

Relevance for WIOA Implementation: Out-of-school youth are a primary focus of WIOA's Title I workforce services, and adults who lack a HSD/E are targets for both Title I and Title II services. Given that foreign-born individuals are significantly over-represented among those with no HSD/E, services created with these funds should be targeted in equitable measure to meet their needs. This will represent a shift for local systems that heretofore have not priori-

tized those with basic skills needs (whether native- or foreign born) for workforce training services, and/or whose service design is largely sequential—i.e. expecting adults to complete basic skills requirements before gaining access to workforce training programs. At the same time, provisions in the law that promote the use of career pathway service designs for serving WIOA clients pose significant capacity-building challenges for the state, given the difficulties many such pathway programs face in equitably serving adults with basic skills needs.¹ Integrated education and training models must also comply with immigration status restrictions placed on Title I-funded programs.² However, while those who lack work authorization are not eligible for WIOA-funded workforce services, all refugees and the majority of Virginia immigrants legally reside in the United States and are therefore eligible for Title I as well as Title II

Table 2. Educational Attainment of Virginia Residents (ages 16 and older), by Nativity, 2009-13

Educational Attainment	Total	Native Born		Foreign Born	
	Number	Number	Percent	Number	Percent

Source: MPI analysis of pooled 2009-13 ACS.

services, which are not subject to immigration status restrictions.³

Finally, the analysis also shows that immigrants ages 19 to 24 who lack a HSD/E and are not enrolled in school are far more likely than their native-born counterparts to be employed. This points to a need for education and training services designed for “nontraditional” students—i.e., in addition to using appropriate instructional designs, programs should anticipate the needs of part-time students, the demands of their work schedules, and transportation issues or other constraints they may face in attending and completing more traditionally structured programs.

3) Limited English Proficiency and Educational Attainment

Estimates of limited English proficiency among Virginia residents are provided below given the relevance of LEP status⁴ for access to WIOA-funded services—e.g., English Language Acquisition services (formerly known as English-as-a-Second-Language or ESL) are a key element of AEFLA services, while adult English learners meet the “priority” definition for adult workforce services.⁵ Table 3 also provides individuals’ LEP status crossed with levels of educational attainment, in order to inform the efforts of state and local planners to provide education and training services that equitably meet the needs of LEP individuals with different levels of formal education.

Foreign-born individuals account for 91 percent of the state’s LEP residents, who number 384,000. Among all LEP individuals ages 19 to 24 and ages 25 and over, 125,000 lack a HSD/E, indicating that 17 percent of the state’s low-educated adults are also LEP. Significant numbers of LEP individuals also have high levels of underlying education, including 89,000 of those ages 25 and older who have earned a high school diploma or

equivalent, and an additional 140,000 who have either completed some college or an associate’s degree or who have earned a bachelor’s degree or higher.

Relevance for WIOA Implementation:

Virginia is home to significant numbers of both LEP adults as well as adults who are low-educated; each group is eligible for AEFLA services, which in recent years meet only about 4 percent of need nationally.⁶ The state faces complex challenges in equitably reflecting the significant and wide range of LEP learner needs and goals in its Combined State Plan that will govern WIOA service provision in Virginia and that the U.S. Secretaries of Labor and Education must ultimately approve. For one, the state’s LEP residents include those who need AEFLA services but may not seek the employment or postsecondary transition and completion goals that are the primary focus of the law’s narrow accountability measures—for example, immigrant mothers of young children seeking literacy and other programming that will help them support their children’s kindergarten readiness, or those seeking citizenship preparation services.

In addition, the law’s significant new emphasis on postsecondary training is likely to pose major challenges for local systems that in the past provided ESL and workforce training services separately and/or served few low-skilled or LEP individuals in Title I programs. While new provisions in WIOA do target workforce services to these basic skills-deficient individuals, the record of career pathway models and other training programs in providing equitable access to individuals who are low-educated and/or LEP is very weak. For example, nationally in the past five years LEP individuals have consistently comprised less than 2 percent of individuals receiving Title I-funded intensive or training services.⁷

Stakeholders in WIOA’s implementation therefore face challenges in ensuring that local service plans and the state’s Combined Plan provide both the range of AEFLA services envi-

sioned under the law and equitable access to Title I-funded services for low-educated and/or LEP individuals who are work authorized. Significant policy, planning, and capacity-building efforts will be needed as the state and its localities take steps to address their obligation to provide equitable access to Title I-funded programs for those who are LEP and lack a HSD/E, as well as the significant number of LEP individuals who already possess a high school diploma or higher and are therefore positioned to directly access postsecondary level training programs.

4) Brain Waste

“Brain waste”—the phrase used to describe when individuals with four-year college degrees or higher work in low-skilled jobs or are unemployed—is a particular concern for foreign-educated immigrants given the unique barriers they often face in attempting to transfer their education, training, and work experience to the U.S. labor market.⁸ Fifty-six percent of foreign-born individuals in Virginia who possess a college degree or higher were educated abroad (see Table 2), indicating a significant share of the state’s highly educated

Table 3. Limited English Proficiency and Educational Attainment of Virginia Residents (ages 16 and older), by Nativity, 2009-13

LEP Population by Educational Attainment	Total	Native Born		Foreign Born	
	Number	Number	Percent Native Born	Number	Percent Foreign Born
Total LEP population	384,000	33,000	9%	351,000	91%

Table 4. Brain Waste among Virginia Residents (ages 25 and older), by Nativity, 2009-13

Brain Waste	Native Born		Foreign Born	
	Number	Percent	Number	Percent
Total civilian, college-educated labor force	1,214,000	100%	237,000	100%
Underutilized (i.e., in low-skilled jobs or unemployed)	170,000	14%	54,000	23%

Note: All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Source: MPI analysis of pooled 2009-13 ACS.

immigrants and refugees is at risk for brain waste.

Data provided in Table 3 point to one of the most significant factors responsible for brain waste—limited English proficiency. Among foreign-born LEP individuals ages 25 and older, 72,000 (23 percent) have completed a bachelor’s degree or higher. Few adult education programs currently provide instruction that can help these individuals acquire the academic or professional-level English that will allow them to fully apply their education and training in the U.S. labor market.

In addition to difficulties accessing professional-level English classes, other factors that can contribute to brain waste include lack of recognition by employers or licensing bodies of academic or professional qualifications obtained abroad, difficulties in filling gaps in education or gaining U.S. work experience, steep and expensive barriers to gaining professional licenses, and/or poor understanding of U.S. job search norms. Table 4 provides estimates of brain waste among native-born and foreign-born residents of Virginia, showing 15 percent of all highly educated workers in the state are affected, with the high levels of education of the foreign born significantly more likely to be underutilized (23 percent versus 14 percent).

Relevance for WIOA Implementation: Highly educated individuals who are LEP fall into the “basic skills deficient” service priority category for Title I adult workforce services and also qualify for AEFLA-funded services. Many of these individuals have degrees in the healthcare, STEM, and education fields where their skills can be applied in high-demand occupa-

tions. Nimble workforce and adult education programs can help address the particular needs of these individuals by braiding funds across titles—or using strictly Title I funds—to help them return to jobs in their profession or a related field that will leverage the significant investments they have already made in their education and training.

5) Parents of Young Children

Parents of young children have long been a population of special focus for adult education and training programs due to the powerful role education and skills play in helping them provide economic stability for their family, and the predictive role of parental education—particularly the mother’s—for the future education success of their children. This focus is especially pertinent now, with policymakers at all levels of government engaged in intensive efforts to scale quality early childhood programs that will close gaps in school readiness that could otherwise threaten children’s lifelong education and career prospects. As their children’s first and most important teachers, parents are universally acknowledged as critical to the success of these efforts.

Though 13 percent of the state’s overall population ages 16 and older, immigrants and refugees in Virginia account for 19 percent of parents residing with at least one child under age 18, and 21 percent of those with at least one child ages 0 to 8. Among parents residing with a child under age 18, single-mother or single-father households are less common among the foreign born (14 percent versus 23 percent for native

Table 5. Family Structure and Young-Child Parental Status for Virginia Residents (ages 16 and older), by Nativity, 2009-13

Parental Status	Total	Native Born		Foreign Born	
	Number	Number	Percent	Number	Percent
Reside with at least one child under age 18	1,633,000	1,320,000	100%	313,000	100%
Single mother	272,000	240,000	18%	32,000	10%
Single father	77,000	66,000	5%	11,000	4%
Two parents	1,283,000	1,014,000	77%	269,000	86%
Reside with at least one child ages 0-8	965,000	762,000	100%	204,000	100%
Limited English Proficient (LEP)	87,000	5,000	1%	83,000	41%
Low-educated	83,000	42,000	6%	41,000	20%
Low-income (below 200% of FPL)	270,000	201,000	26%	69,000	34%

FPL = Federal poverty level.

Notes: Limited English Proficient (LEP) refers to any person age 5 and older who reported speaking English less than "very well" as classified by the U.S. Census Bureau. The federal poverty level (FPL), calculated based on total family income before taxes (excluding capital gains and noncash benefits such as food stamps), was \$23,834 for a family of four in 2013. All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Source: MPI analysis of pooled 2009-13 ACS.

born). Most strikingly, immigrants and refugees comprise nearly half of the state’s low-educated parents of young children, being more than three times as likely as their native-born counterparts to lack a high school diploma or equivalent. Foreign-born parents of young children are also more likely to have low incomes—34 percent versus 26 percent of the native born. Not surprisingly, foreign-born parents account for the vast majority of the state’s LEP parents of young children (95 percent).

Relevance for WIOA Implementation: Though WIOA’s Title II provisions speak of services that “enable parents or family members to support their children’s learning needs” and provide “training for parents or family members regarding how to be ... full partners in the education of their children,” the law’s performance measures leave little room for states to serve parents who are arguably most in need of these services. Many low-educated and/or LEP parents who seek such programs do not have learning goals that align with the law’s primary performance measures—particularly those focused on employment, earnings, and secondary/postsecondary degree and credential attainment.⁹ With all WIOA-funded programs judged

according to these measures and with states facing financial penalties should they not meet performance targets, many states and localities may be reluctant to provide AEFLA services to low-educated and LEP parents whose primary concerns are basic literacy and supporting their children’s kindergarten readiness and future educational success. Should Virginia choose to maintain parent-focused programs for this population it would likely need to negotiate lower performance targets for these programs on the law’s six accountability measures, and presumably judge their performance against state measures that better reflect expected outcomes of parent-focused programs. Alternatively, the state or its localities may simply avoid serving many parents of its most at-risk young children with AEFLA funds—even though failing to address their needs could undermine the success of investments being made by all levels of government in early childhood education and care services.

6) Poverty and Health Insurance

WIOA’s investments are intended to help meet

Table 6. Poverty and Health Insurance for Virginia Residents (ages 16 and older), by Nativity, 2009-13

	Total	Native Born		Foreign Born	
Poverty	Number	Number	Percent	Number	Percent
Population (for whom poverty status is determined)	6,219,000	5,381,000	100%	839,000	100%
Below 100% of FPL	641,000	549,000	10%	92,000	11%
100-199% of FPL	897,000	753,000	14%	145,000	17%
At or above 200% of FPL	4,681,000	4,079,000	76%	602,000	72%
Health Insurance Coverage					
Total population	6,444,000	5,594,000	100%	850,000	100%
No health insurance coverage	907,000	655,000	12%	252,000	30%

FPL = Federal poverty level.

Notes: The federal poverty level (FPL), calculated based on total family income before taxes (excluding capital gains and noncash benefits such as food stamps), was \$23,834 for a family of four in 2013. All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Source: MPI analysis of pooled 2009-13 ACS.

local needs for skilled workers while also reducing welfare dependency and supporting workers in attaining education and skills that will allow them to earn a family-sustaining wage. While many of Virginia’s immigrants enjoy high levels of education and earnings, Table 6 data indicate that the state’s foreign-born residents are slightly more likely to earn below either 100 percent or 200 percent of the federal poverty level (FPL),¹⁰ with 28 percent falling below the 200 percent threshold as compared to 24 percent for those who are native born. Looking to an additional indicator of economic vulnerability, the state’s foreign-born adults are 2.5 times more likely to lack health insurance coverage than those who are native born.

Relevance for WIOA Implementation: WIOA’s broad architecture as well as many of its specific provisions place a tight focus on directing services to low-income individuals, with the goal of helping them attain the education, degrees, and credentials they need to ensure a lifetime of improved earnings and economic stability. The disproportionate representation of foreign-born individuals among Virginia residents living in or near poverty provide important measures against which the adequacy of state and local service designs and equity in distribution of services can be gauged.

7) U.S. Citizenship and Immigration Status

Publicly available data from the U.S. Census Bureau’s American Community Survey (ACS) are the basis for all figures provided in the preceding sections of this profile. However, immigration status affects eligibility for certain WIOA services, and the ACS does not collect detailed information on respondents’ immigration status. To better assist stakeholders in considering the interplay of immigration status with WIOA implementation efforts, Table 7 provides estimates of the shares of foreign-born Virginia residents in key immigration-status categories. The MPI estimates are based on a methodology that imputes immigration status from two Census Bureau surveys—the ACS and the Survey of Income and Program Participation (SIPP).¹¹ In part because this methodology involves inflating ACS figures in order to account for presumed undercounting of noncitizens, especially those who are unauthorized, the figures are not directly comparable to the estimates used in the earlier portions of this profile.

Using this methodology, MPI estimates that among Virginia immigrants ages 16 and older, 43 percent were naturalized citizens. Of the approximately 536,000 noncitizens, 44 percent

Table 7. U.S. Citizenship Status of Foreign-Born Residents (ages 16 and older) in Virginia, 2009-13

U.S. Citizenship Status	Number	Percent
Foreign born	945,000	100%
Naturalized citizens	409,000	43%
Noncitizens	536,000	57%
Legal permanent residents	238,000	44%
Legal nonimmigrants	69,000	13%
Unauthorized immigrants	229,000	43%
DACA immediately eligible (2012)	24,000	10%
DACA eligible but for education (2012)	5,000	2%

Note: All numbers are rounded to the nearest thousand; calculations in the text use absolute numbers.

Sources: MPI analysis of pooled 2009-13 ACS, and the 2008 Survey of Income and Program Participation (SIPP) by James D. Bachmeier and Colin Hammar of Temple University and Jennifer Van Hook of The Pennsylvania State University, Population Research Institute.

were lawful permanent residents (LPRs) and 43 percent were unauthorized.¹² Within the unauthorized population, 13 percent—about 29,000 individuals—were potentially eligible to apply for protection from deportation and work authorization under the Deferred Action for Childhood Arrivals (DACA) program when it first launched in 2012, with thousands more aging into eligibility since that time. Many have come forward to obtain these protections; according to U.S. Citizenship and Immigration Services (USCIS), 10,437 Virginia residents had received DACA status as of June 2015.¹³

Relevance for WIOA Implementation:

Immigration status is relevant to a variety of WIOA programs beyond the broad provisions described earlier that restrict unauthorized

immigrants from accessing Title I services and the absence of status restrictions placed on Title II services. For example, under Title II a primary purpose of the Integrated English Literacy and Civics Education program is to support immigrants in preparing for citizenship and full participation in the civic life of their community.¹⁴ And while all immigrants—regardless of immigration status—are eligible for AEFLA services, states that choose to braid Title I and II funds to provide integrated education and training services may inadvertently place Title II funds beyond the reach of unauthorized immigrants and/or create the need to implement complex new administrative procedures to assess the immigration status of recipients of adult education services.

Endnotes

- 1 See, for example, John Wachen, Davis Jenkins, Clive Belfield, and Michelle Van Noy with Amanda Richards and Kristen Kulongoski, *Contextualized College Transition Strategies for Adult Basic Skills Students: Learning from Washington State's I-BEST Program Model* (New York: The Community College Research Center, Teacher's College, Columbia University, 2012), 21-22, www.sbctc.ctc.edu/college/abepds/ibest_ccrc_report_december2012.pdf.
- 2 See the final section of this fact sheet for additional data and information on immigration status issues.
- 3 In addition, many unauthorized young adults are eligible for protection under the Deferred Action for Childhood Arrivals (DACA) program; DACA approval would allow them to qualify for WIOA Title I services, as opposed to strictly *Adult Education and Family Literacy Act*-funded services.
- 4 Limited English Proficient (LEP) refers to any person age 5 and older who reported speaking English less than "very well" as classified by the U.S. Census Bureau.
- 5 Individuals considered a priority for Title I adult employment and training services are "recipients of public assistance, other low-income individuals, and individuals who are basic skills deficient." See *Workforce Investment and Opportunity Act*, Public Law 113-128, *U.S. Statutes at Large* 128 (2014) 1425, Title I Sec. 134 (c)(3)(E), www.congress.gov/113/bills/hr803/BILLS-113hr803enr.pdf.
- 6 For example, in 2013 Title II adult education programs served about 1.6 million people while MPI estimates that among adults 19 and over, approximately 43 million were either low-educated or LEP. For adult education enrollment data, see U.S. Department of Education, Office of Career, Technical and Adult Education, National Reporting System, "State Enrollment by Program Type (ABE, ASE, ESL): All States," program year 2013, www.wdcrobcolp01.ed.gov/CFAPPS/OVAE/NRS/reports/.

About the Authors

Margie McHugh is Director of the Migration Policy Institute’s National Center on Immigrant Integration Policy. Her work focuses on education quality and access issues for immigrants and their children from early childhood through K-12 and adult, postsecondary and workforce skills programs. She also leads the Center’s work seeking a more coordinated federal response to immigrant integration needs and impacts, and more workable systems for recognition of the education and work experience immigrants bring with them to the United States.

Prior to joining MPI, Ms. McHugh served for 15 years as Executive Director of The New York Immigration Coalition, an umbrella organization for over 150 groups in New York that uses research, policy development, and community mobilization efforts to achieve landmark integration policy and program initiatives. Prior to joining NYIC, Ms. McHugh served as Deputy Director of New York City’s 1990 Census Project and as Executive Assistant to New York Mayor Ed Koch’s chief of staff.

Ms. McHugh is a graduate of Harvard and Radcliffe Colleges.

Madeleine Morawski is an Associate Policy Analyst at MPI, where she provides program support for the National Center on Immigrant Integration Policy and works on issues such as adult education, early childhood education, and language access.

Previously, Ms. Morawski worked as a Research Assistant at the Kalmanovitz Initiative for Labor and the Working Poor and as an intern with the U.S. Committee for Refugees and Immigrants.

She has a bachelor’s of science in foreign service from Georgetown University, where she majored in international politics and completed a certificate in international development.

Acknowledgments

The authors are grateful to MPI colleagues Jie Zong and Jeanne Batalova for their compilation of U.S. Census Bureau data used throughout this fact sheet.

For more information please contact Margie McHugh, Director of MPI's National Center on Immigrant Integration Policy (mmchugh@migrationpolicy.org), or Associate Policy Analyst Madeleine Morawski (mmorawski@migrationpolicy.org).

The Migration Policy Institute (MPI) is an independent, nonpartisan, nonprofit think tank dedicated to the study of the movement of people worldwide. The Institute provides analysis, development, and evaluation of migration and refugee policies at the local, national, and international levels. It aims to meet the rising demand for pragmatic responses to the challenges and opportunities that migration presents in an ever more integrated world.
